A positive, determined individual seeking to further develop skills in the industry. Demonstrated team leadership, communication and organisational skills in experiences throughout education and work. Using every opportunity to expand my skills and experiences through new environments. Always eager to learn and improve while encountering challenging situations.

Education

University of Lincoln — 2015 – 2018, Lincoln, UK

BSc (Hons) Computer Science
Upper Second-Class Honours, 68%

Key Modules: Problem Solving, Programming and Data Structures, Web Authoring, Object-Oriented Programming, Database Systems, Programming Paradigms, Mobile Computing, Software Engineering and Cross-Platform Development.

Work Experience

Odeon Cinema — Oct 15 – Jan 16, Lincoln, UK

Cinema Host
- Great Customer service – Selling food and tickets to customers
- Good time management – Many tasks during the role had to be completed swiftly
- Adapted to fast pace environment – Due tasks being fast paced, I had to quickly adapt to the fast space environment

Volunteer for Evelina London Children's Hospital — June – Aug 15, London, UK

Fundraiser
- Good communication skills – Often I had to be confident and clear when talking to the public to explain the cause of the charity

Recent Projects

BiNow Limited — June – Dec 18

Java, Python, MySQL
A start-up founded by a small group of students, to develop a self-sustained "deal ecosystem" that allows consumers to be notified when a deal that meets their specific criteria is available (e.g. Product, Price, Saving, Category etc).

Skills

Languages: C++, C#, Java, Visual Basic, Python, HTML, CSS, JavaScript and MATLAB.

Operating Systems: Windows, Ubuntu

Development Tools: Git, Eclipse, Visual Studio, Android Studio, MATLAB

Other: Teamwork/Management, Communication, Organisational, Problem Solving

Activities and Interests

Course Rep – Representing students in my computer science course included listening to their feedback about the course and making sure that it was heard, to make changes in the delivery of the course. Overall making a better experience for every student. Interacting with people was one of my favourite things about this role.

Tech Enthusiast – The continuing growth of technology is what I love most about the computing field, I'm always excited for what's next.

Photography – Photography and travelling are my other biggest passions, my dream is to travel around the world capturing its' wonders with my camera. In my opinion, photography gives me a better attention to detail as I often look for the small details that make a photo more appealing.
